

Dear friends, partners,....

We want to share with you our **digital workcamp "This is Peace to Me"**, which will bring together approximately 15 participants from different countries, from all continents! We are very enthusiastic about it, and we hope that you will find it interesting and useful!

The objective is to collaboratively develop a timeline illustrating how wars have affected the environment and human lives, while also highlighting the role of volunteer groups in reducing inequalities and promoting values such as respect, mutual understanding, solidarity, and collective action. These elements aim to strengthen the sense of peaceful coexistence among people from diverse cultural backgrounds.

Participants will work in small, internationally mixed groups to further examine the devastating environmental consequences of war. Based on visual material (photographs), each group will create artistic outputs (in any form or medium) that will form part of a digital anti-war exhibition.

The exhibition will present the historical timeline through photographs, accompanied by the participants' artistic creations, which will serve as interpretative narratives. On the last day of the project, an online final event will be organized. During this event, participants will present their experiences to the public, who will have the opportunity to explore the exhibition online.

Local stakeholders and organizations promoting non-violent conflict resolution—both at the level of international relations and interpersonal relationships—will be invited to participate. If you are interested in participating in it, please **complete the application**

form by the 9th of September! The link for the application form: <https://forms.gle/wq4jqsjhAbhuY4E28>
